

Quincy Data — McKay Brothers

Low latency update

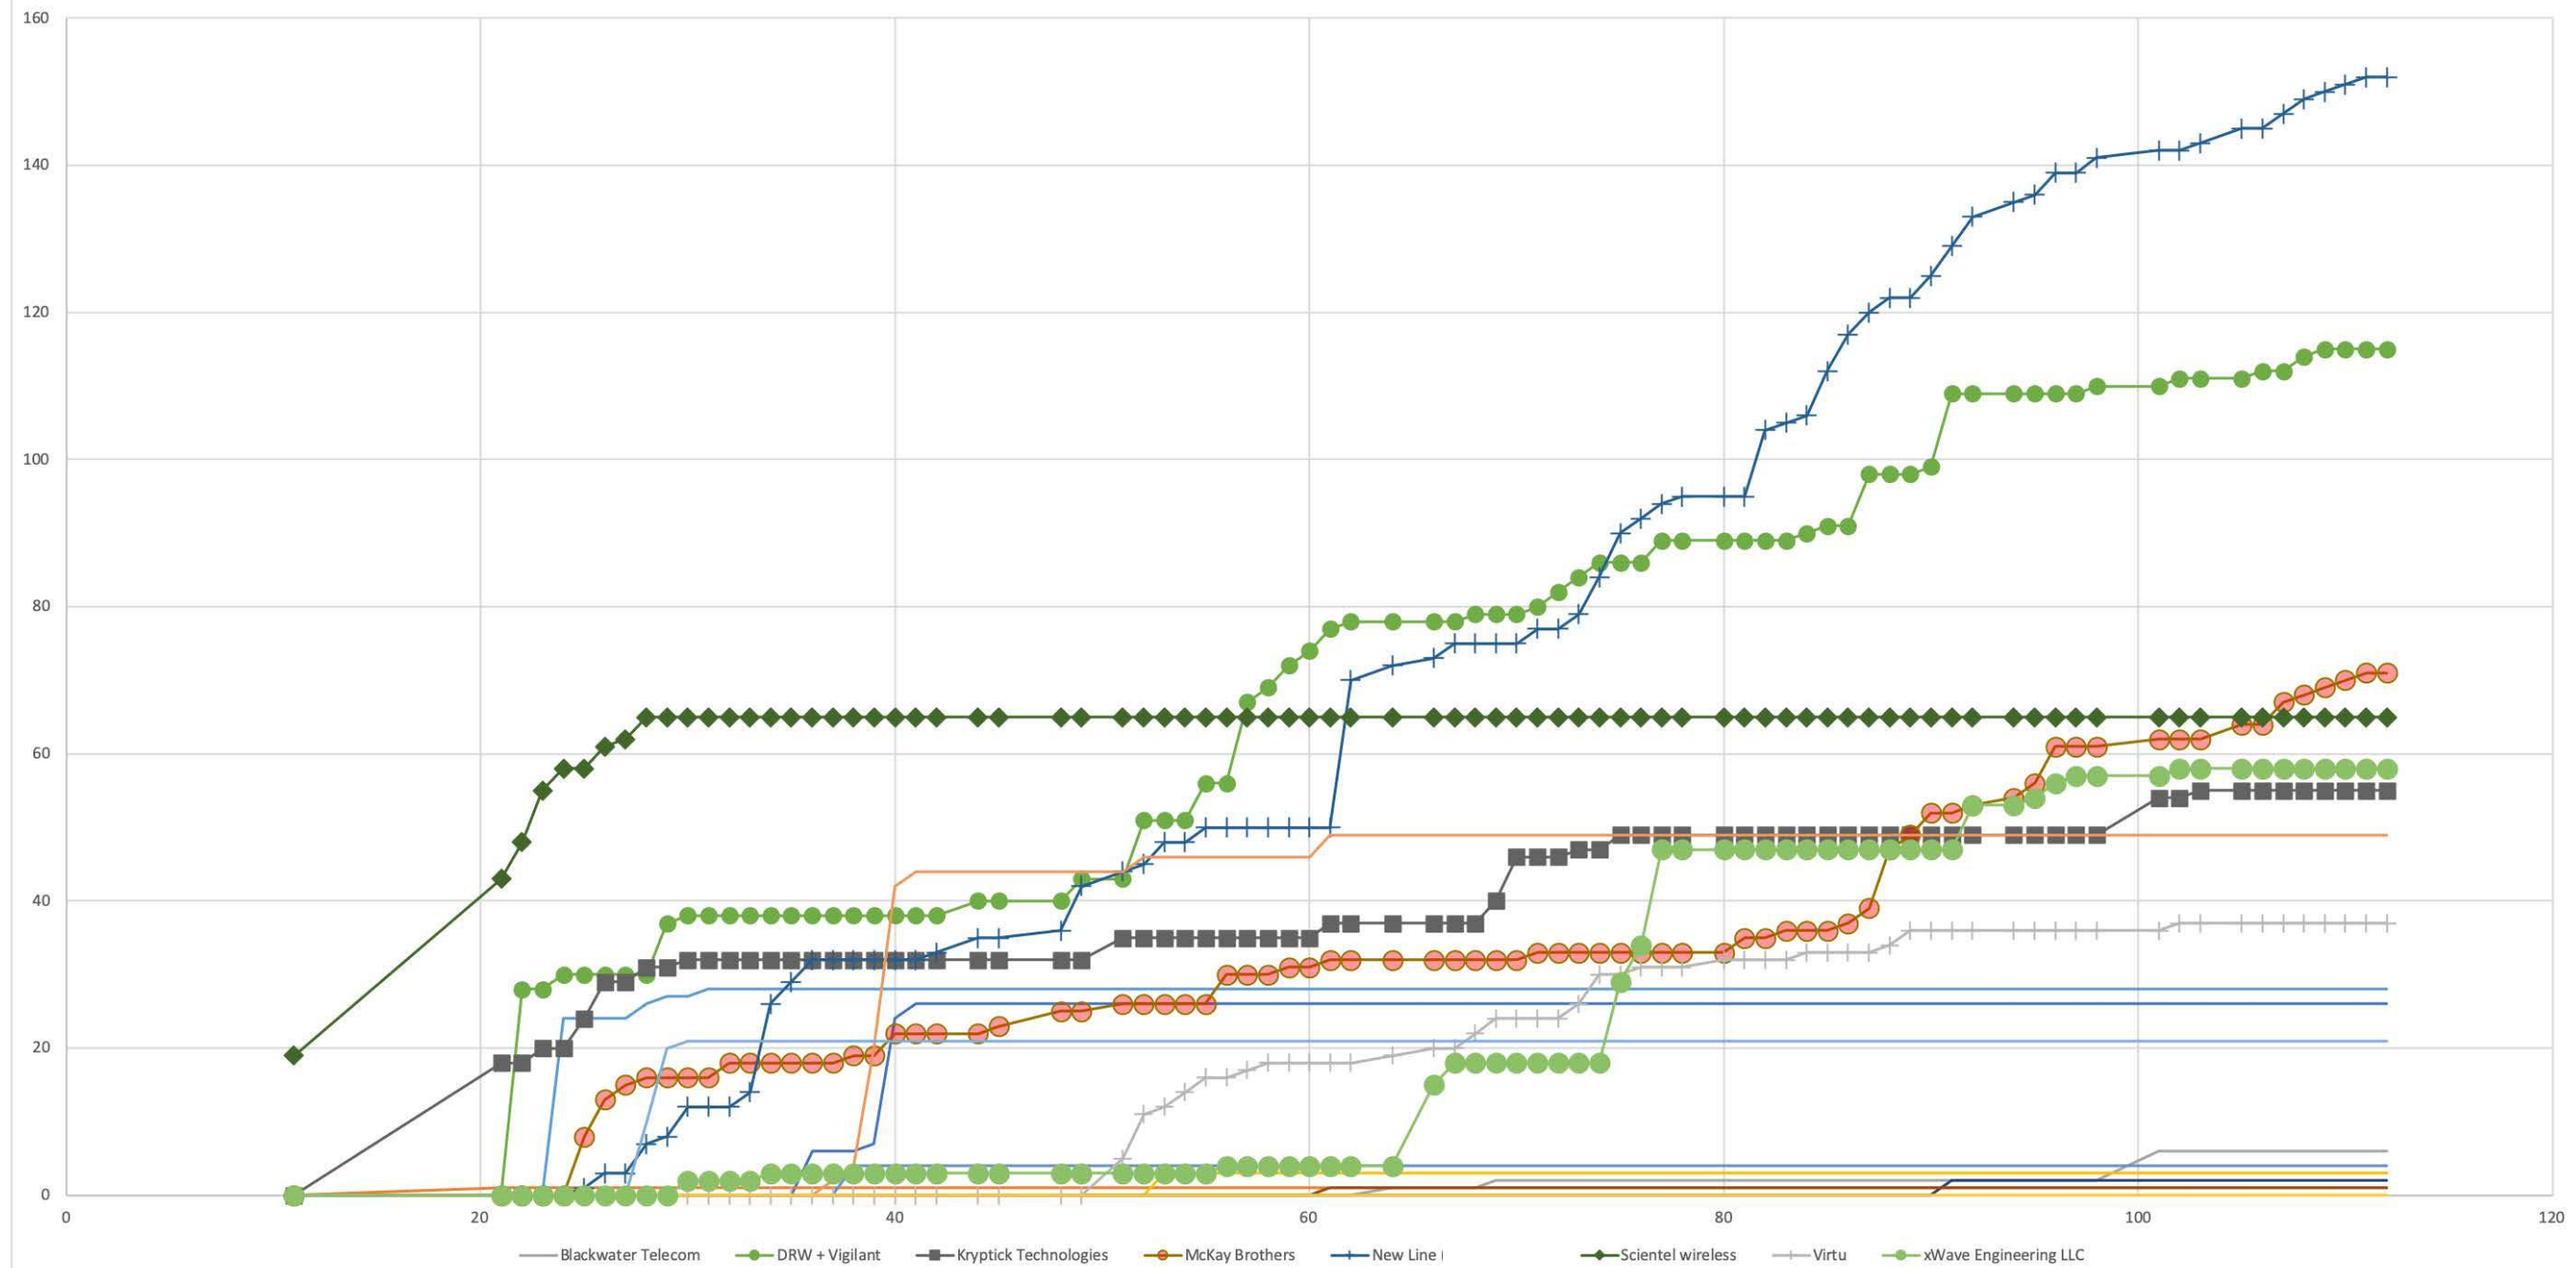

Stéphane Tyc, Sep 2019

Quincy Data — McKay Brothers

Chicago to New Jersey

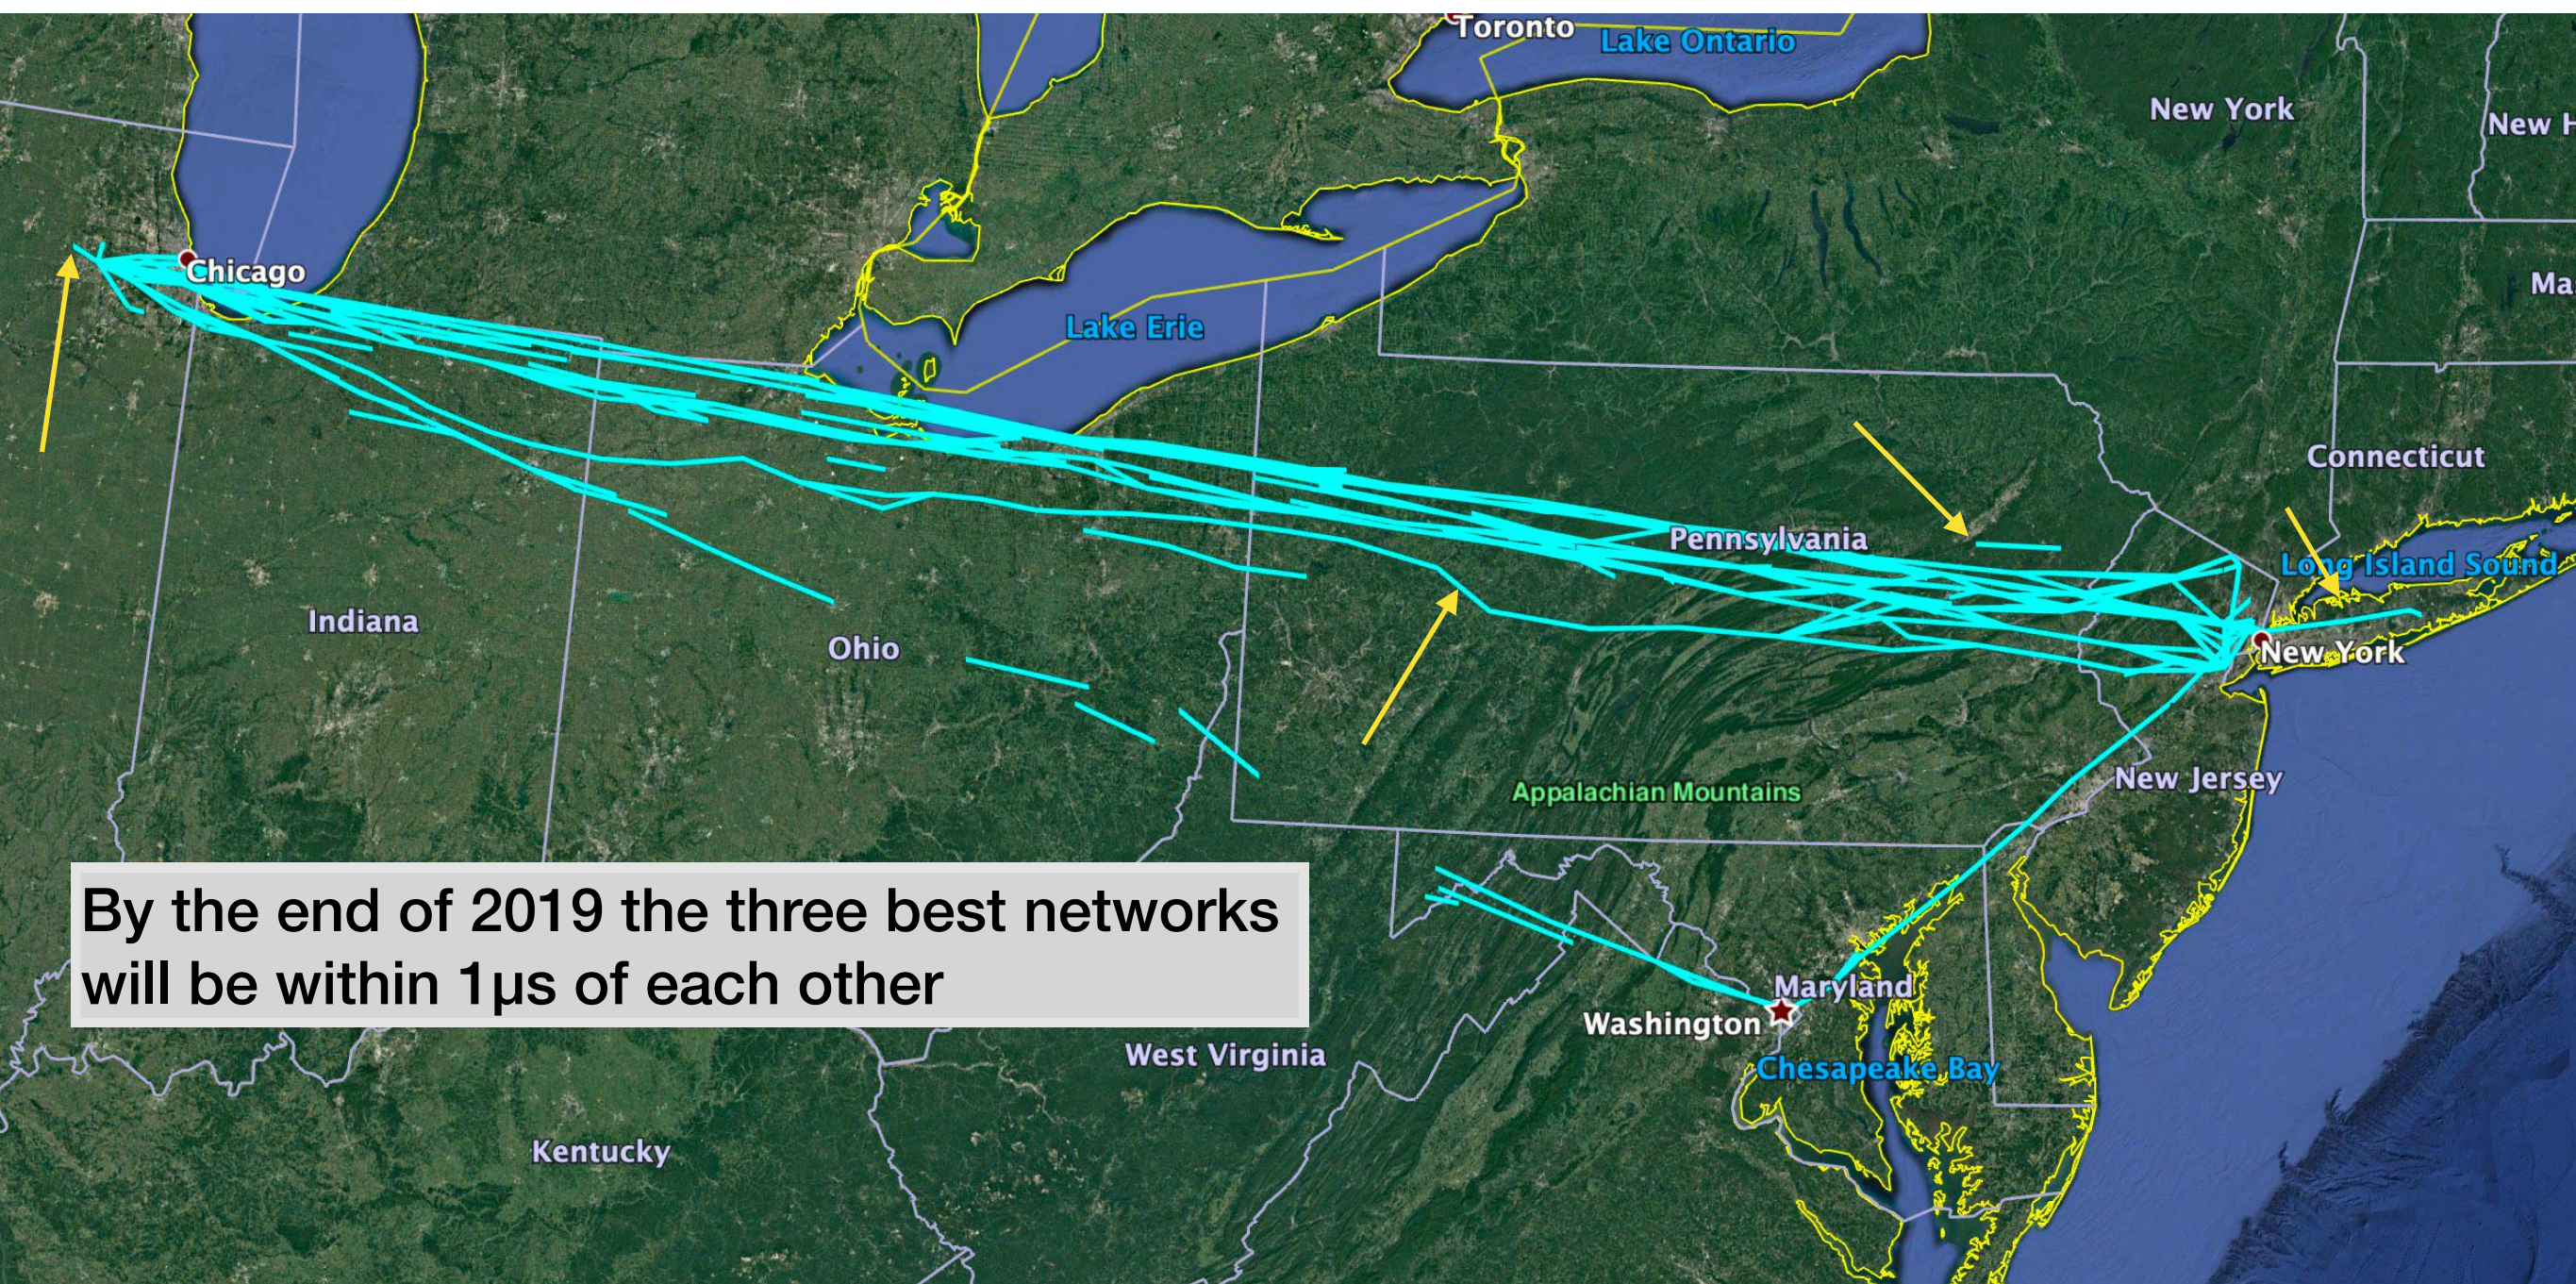

Active licence count per company vs months since 2011

Quincy Data — McKay Brothers

All active licenses filed since 2018

Quincy Data — McKay Brothers

**Top three wireless networks
for each leg of the triangle**

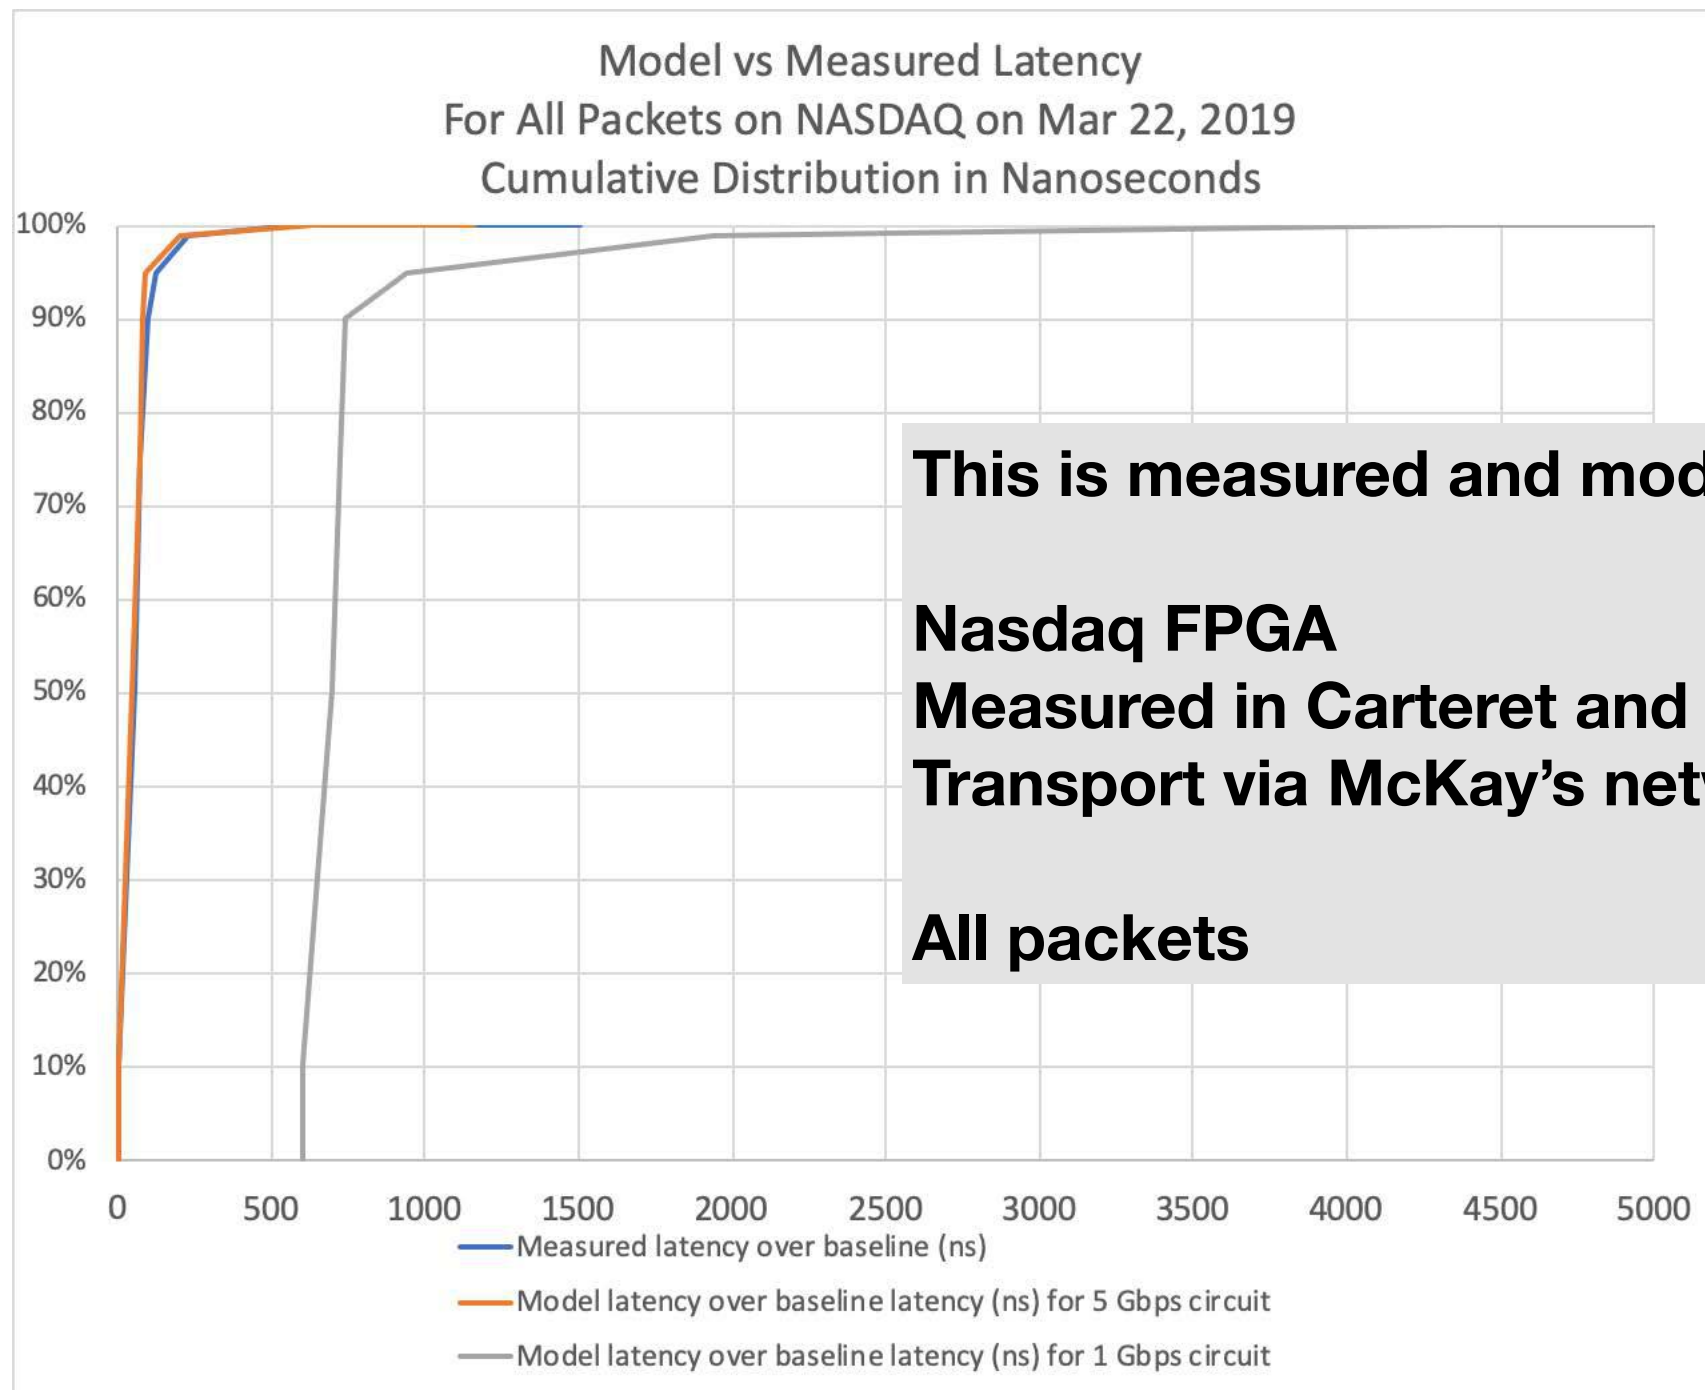

**McKay has exclusive use of the LMDS
band at 28 GHz.**

- 1. Straighter**
- 2. More reliable**
- 3. More bandwidth**

**All other networks use E-Band which is
congested.**

**Adding bandwidth will add path length.
Reducing path length with existing
bandwidth is hard.**

What to send?

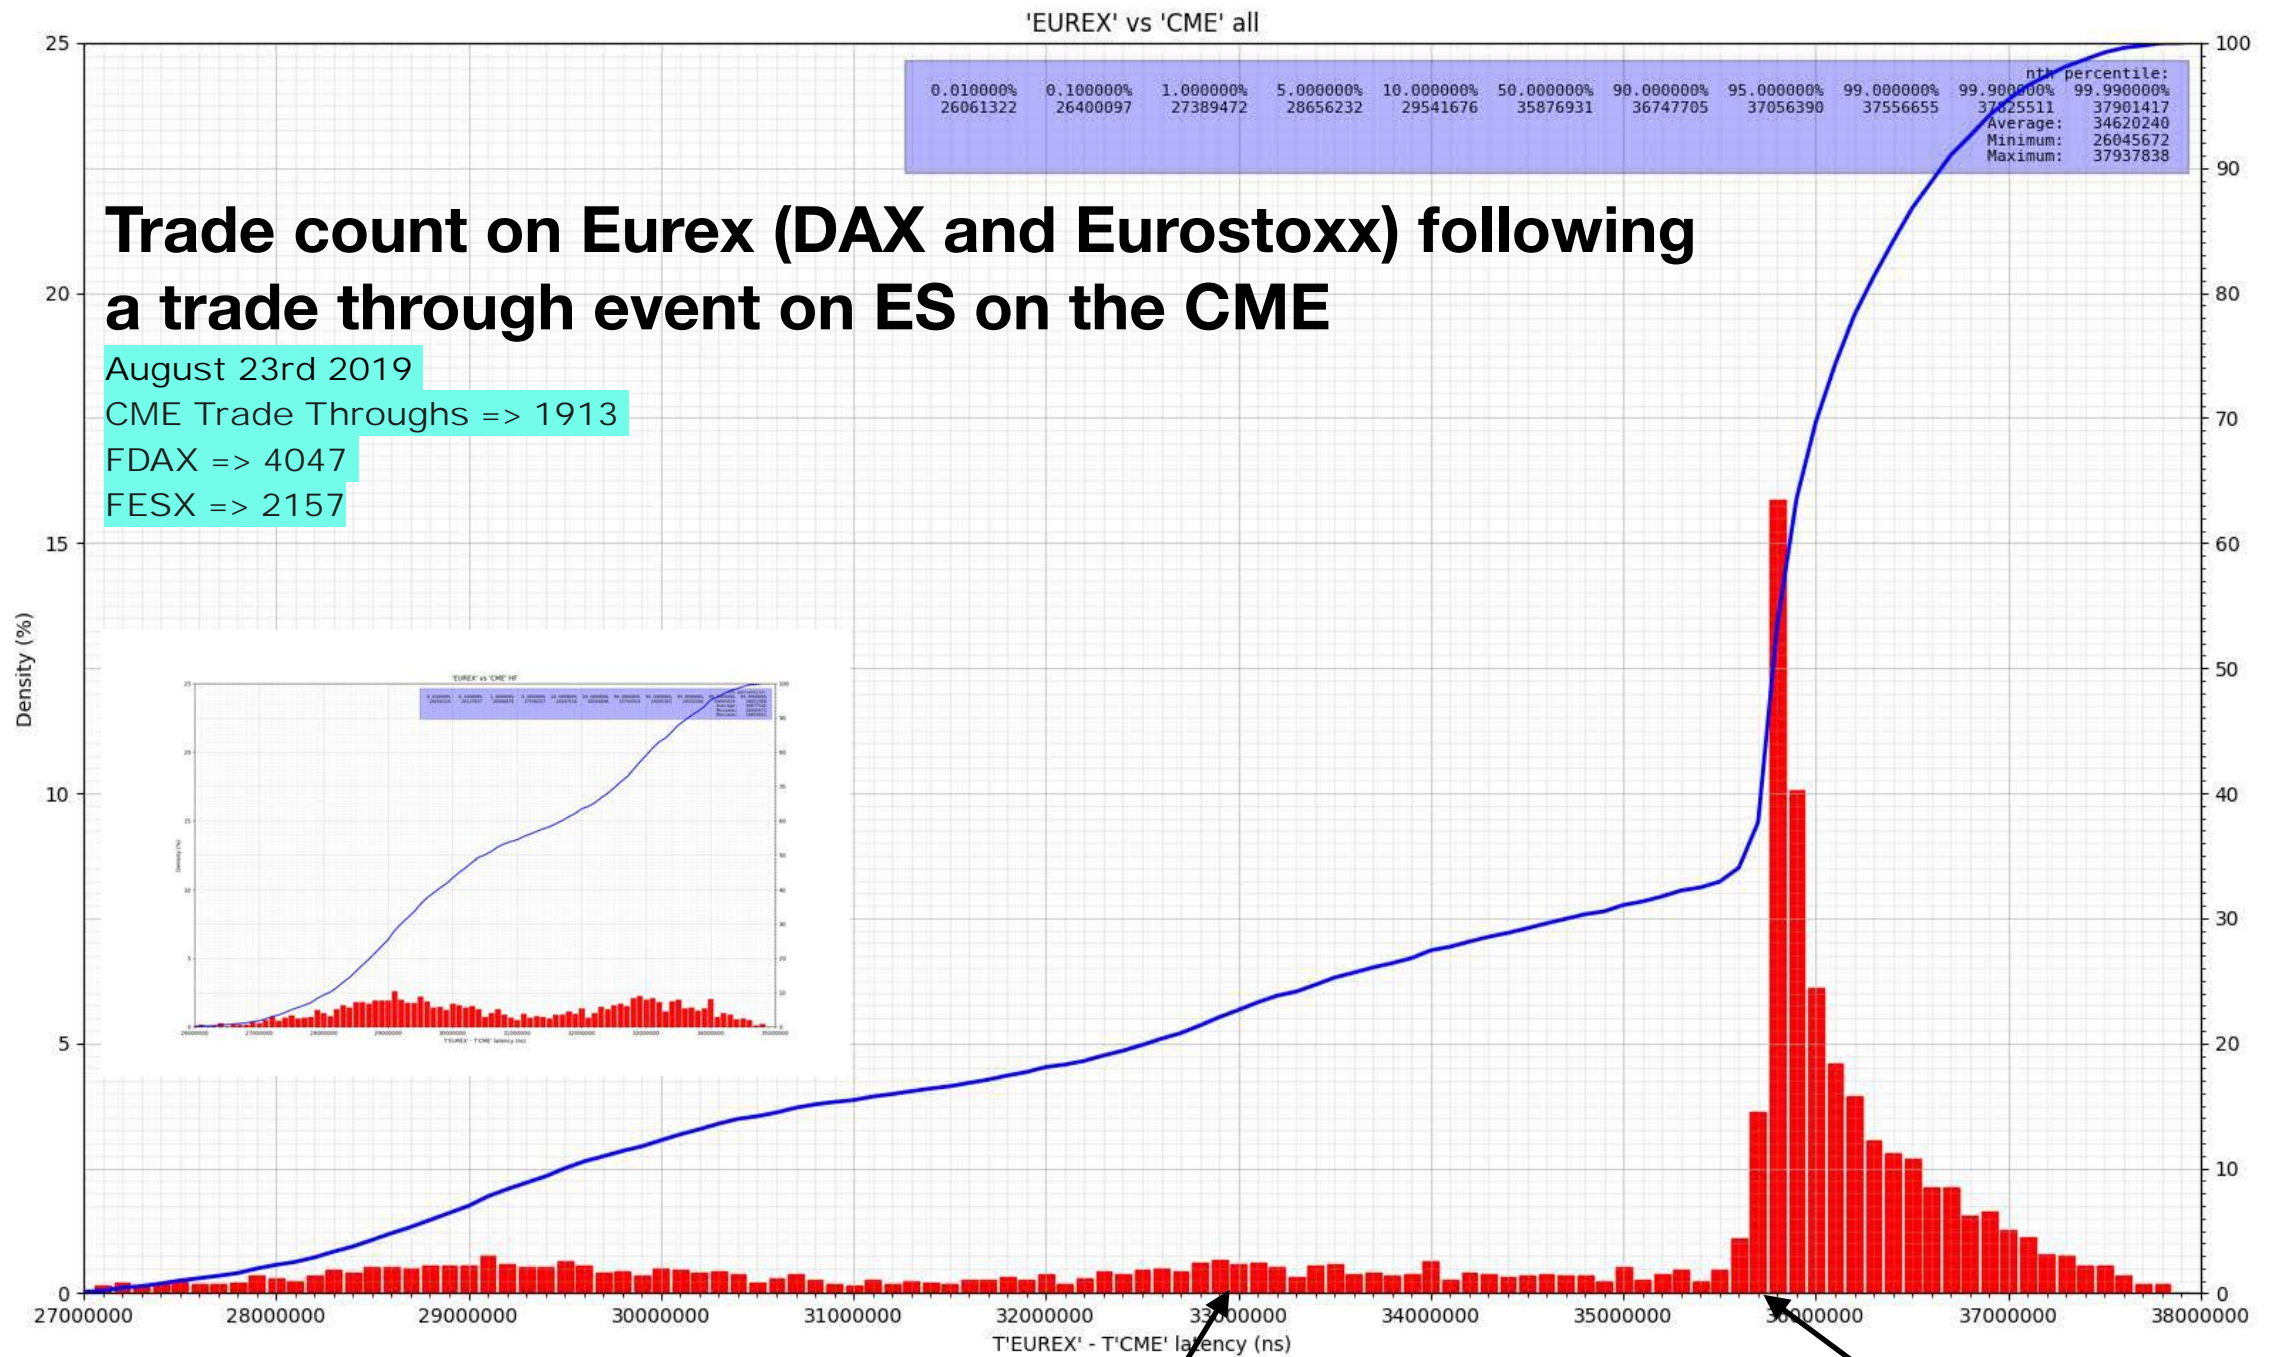

“Trade throughs”: an aggressor order removes completely the first limit and takes some of the second or third....

This is a sample count for two days and for relevant futures contracts on the CME

The order of magnitude of these trades is 10 000 per day.

Approximately 10% of the events occur in a 30 ms window.
